How to prepare a Ward Profile

Every five years your Ward Development Committee (WDC) will need to produce a Ward Priorities Plan. In some LLGs you will also need to prepare a **Ward Profile**. The Ward Profile is a document which records important information about your Ward – like the number of people living in each village or the number of girls in grade 4 or the number of vehicles that are working.

However, until this happens WDCs will need to prepare a Ward Profile. Prepare your Ward Profile when you prepare your Ward Priorities Plan.

Have a look at the Ward Profile form – you will see that the instructions for how to fill it out are on the form. Go through the instructions to make sure everything is clear.

When you have prepared your Ward Profile, make three extra copies:

- ✓ One copy for the LLG (if they ask for it).
- ✓ One copy to put in the ward's filing cabinet as a record. Records are history.
- ✓ One copy for the WDC to put on a ward notice board for everyone to see. Ples klia. Opim ai bilong ol manmeri wanwod.
- ✓ Keep the original Ward Profile so you can update it each year (the original Ward Profile form is the one you completed using PENCIL.

How to update your Ward Profile

The Ward Profile needs to be updated each and every year. This means each and every year the WDC needs to go through the Ward Profile and make sure the information is up to date.

Your WDC should have the Ward Profile updated (and ready to submit to the LLG if they ask for it) by the end of February each and every year. The reason you need to wait until the end of February is

that some information for the Ward Profile, like information on school enrolment, can only be completed after the school year begins in the middle of February.

To update your Ward Profile it is simply a matter of going through the form at the start of each year and changing what you need to so that the information is correct. If you USE PENCIL when you complete your Ward Profile this is easy.

You will definitely need to get help to update some sections of the Ward Profile – for example the section on Education will need help from the Head Teacher and the section on Health will need help from a Health Worker.

When you have updated your Ward Profile, make three extra copies:

- ✓ One copy for the LLG (if they ask for it).
- ✓ One copy to put in the ward's filing cabinet as a record. Records are history.
- ✓ One copy for the WDC to put on a ward notice board for everyone to see. Ples klia. Opim ai bilong ol manmeri wanwod.
- ✓ **Keep the original Ward Profile so you can update it each year** (the original Ward Profile form is the one you completed using PENCIL.

BIKPELA TOK. Updating your Ward Profile is something your WDC should do anyway – maski LLG singautim o nogat.

- ✓ Updating your Ward Profile means your WDC has the latest information to hand so you can make decisions *na givim stia long stretim sindaun*. If you rely on information in last year's Ward Profile, it might be out of date.
- ✓ Updating your Ward Profile means that if you want help from a donor or a resource company or an NGO you have up-to-date information to give them.
- ✓ Updating your Ward Profile every year means you will build up a record (a database) of what is happening in your ward. PNG is an oral culture. History, *tumbuna* stories, who is related to who, rules and *kastom*, what decision the Chief made everything is passed on by word of mouth and remembered. PNG is changing. Now PNG is becoming an oral and print culture. In an oral and print culture things are remembered *and* written down. What a story it would show if your Ward had a copy of the Ward Profile for each year going back 30 years. This is written history.

LAS TOK. The Ward Recorder is responsible for updating the Ward Profile – and for submitting it to the LLG. This doesn't mean the Ward Recorder does everything – but they are responsible for making sure it is done. It is far better if the whole WDC is involved with updating the Ward Profile. Most WDCs hold a ward planning meeting to do this.

Your LLG should give you a new Ward Profile form wh years). It is a good idea to <u>USE PENCIL</u> to complete the Plan) to the LLG in July make three copies – one for the on a Ward notice board for everyone to see. Keep the pencil just rub out and change what you need to. If you year, then do so. Repeat the same process – make thr	WEW GITTER

Name of household use crop	% households growing or gathering it for household use	How important for household use? 1=HIGH, 2=MIDDLE, 3=LOW	Name of household use crop	% households growing or gathering it for household use	How important for household use? 1=HIGH, 2=MIDDLE, 3=LOW	household use in the table above. Write down crops grown or gathered for cash in the table below.
						Household use means it is not grown or gathered for cash but is instead used for food or recreation (e.g. tobacco or buai) or building materials or medicine or in some other way.
						Cash crops are grown for money. If the crop is grown or gathered to exchange for other goods do not include it as a cash. Instead included it as household use.
						Estimate the number of households in the Ward growing or gathering the crop. Then divide this number by the total number of households in the Ward and times by 100. This will give you a percentage (%).
Name of cash crop	% households growing or gathering it for cash	How important for cash? 1=HIGH, 2=MIDDLE, 3=LOW	Name of cash crop	% households growing or gathering it for cash	How important for cash? 1=HIGH, 2=MIDDLE, 3=LOW	Next indicate how important the crop is for these households (1=high, 2=middle, 3=low).
		3-LOW			J-LOW	If a crop is grown or gathered both for household use and for cash, then include it in both tables.
						Examples of crops include:
						Sweet potatoe Carrots mushrooms Flowers Fruit tree Nuts Spice Tree leaves (lip diwai) Beetlenut (buai) Mustard (daka) Forestry (trees planted for timber) Bamboo (for building) Cocoa
						Broccoli Coffee Coconut Sago (sak sak)

ECONOMY – LIVESTOCK Write down livestock rasied or hunted for household use in the % households How important % households How important table above. Write raising or for household raising or for household down livestock raised Livestock hunting it for use? 1=HIGH, Livestock hunting it for use? 1=HIGH, household 2=MIDDLE, or hunted for cash in household 2=MIDDLE, use 3=LOW use 3=LOW the table below. Household use means it is not raised or hunted for cash but is instead used for food or in some other way. If the livestock is raised or hunted to exchange for other goods do not include it as cash. Instead included it as household use. Estimate the number of households in the Ward raising or hunting the livestock. Then divide this number by the total number of households in the Ward and times by 100. This will give you a percentage (%). Next indicate how important the livestock is for these households (1=high, 2=middle, 3=low). If livestock is raised or How important How important % households % households hunted for both for cash? for cash? raising or raising or household use and for Livestock Livestock 1=HIGH. 1=HIGH, hunting it for hunting it for cash, then include it in 2=MIDDLE, 2=MIDDLE, cash cash both tables. 3=LOW 3=LOW Examples of livestock include: Bees **Ducks** Goats Chickens Cows Cassowary (muruk) Bird of paradise Pigs Fish Snails Rabbits Guinea pigs Butterfly Cuscus (kapol) Buffalo Beche de mer Dugong Turtle If you need more space use extra paper.

ECONOMY – GO	OODS PRODU	CED LOCAL	LY			Goods produced locally are things made by
Product	% households making it for household use	How important for household use? 1=HIGH, 2=MIDDLE, 3=LOW	Product	% households making it for household use	How important for household use? 1=HIGH, 2=MIDDLE, 3=LOW	people. These might be things made from plants or animals or from other materials.
		J-LOW			3-LOW	Write down products made for household use in the table above. Write down products made for cash in the table below.
						Household use means it is not made for cash but is instead in some other way (for example soap or scones).
						If the product is made to exchange for other goods do not include it as cash. Instead included it as household use.
						Estimate the number of households in the Ward making the product. Then divide this number by the total number of households in the Ward and times by 100. This will give you a percentage (%).
Product	% households making it for cash	How important for cash? 1=HIGH, 2=MIDDLE, 3=LOW	Product	% households making it for cash	How important for cash? 1=HIGH, 2=MIDDLE, 3=LOW	Next indicate how important the product is for these households (1=high, 2=middle, 3=low).
						If a product is made for both household use and for cash, then include it in both tables.
						Examples of goods produced locally include:
						Bags (billum) Salt Soap Arrows Canoe
						Lime Baskets Necklaces Clothes Decorations (bilas)
						Scones Bread Rope
						If you need more space use extra paper.

ECONOMY – MARKETS Copy down the crops or livestock or goods produced locally Main way to Time to travel (products) from the The crop or livestock or Nearest market (which travel to to nearest previous section that product that is marketed nearest market market Ward or town?) are sold for cash. (W,V,B,P) (0,1,2,3)Then for each item write down the nearest market (the nearest place it can be sold) Then use the following codes to write down the main way people travel to the nearest market. W= Walk V= Vehicle B= Boat P= Plane Then use the following codes to write down how many hours it takes people to travel to the nearest market. 0= less than 1 hour 1= 1-4 hours 2= 4-8 hours 3= more than 1 day You can use a combination of codes for the main way people travel to the nearest market. For example: WV = walk and vehicle. But the time taken should be the combined time. When you think about how many hours it takes to get to the market think about the season you sell it in - if it is the wet season, it may take longer. If you need more space use extra paper.
